Hi, I'm Tom

I'm a Senior Product Designer with over 15 years of experience designing digital products, some of which serve billions of people.

Senior Product Designer

NAB, Melbourne (2025 — 2026)

Led the design for 0-1 software in NAB's business lending space. Partnered with bankers to understand complex business and regulatory operations and turn them into intuitive approval and execution flows. Brought systems thinking and reusable patterns to high-stakes financial workflows, designed within complex legacy system constraints, and supported lending at billion-dollar scale. Mentored designers on agentic prototyping with Cursor, Figma MCP, and Git, improving speed and craft across the design team.

Senior Product Designer

Meta, San Francisco (2019 — 2023)

Lead designer on the Core Growth team for Instagram & Facebook's registration/login products, the front door for billions of users. Owned the full loop: defining and pitching design strategy, shaping experiments, interpreting results with strong data literacy, and presenting insights to leadership to influence ship decisions on some of the apps' highest-impact surfaces. This lifted top-line metrics and accelerated adoption in emerging markets.

Principal Product Designer

Jtribe Apps, Melbourne (2016 — 2019)

Transformed a medium-sized app development studio by introducing Product Design services. Built and led a small mobile design team which drove 28% uplift in agency revenue. Achieved 3 individual App Store features and 6 top-five categorical rankings. Clients worked with included Movember, Save the Children, and Roll'd.

Freelance Mobile Design Lead

PokerStars, London (2012 — 2016)

Led the redesign of the mobile app onboarding, resulting in a +14% registration increase from a 40 million user base. Led and recruited small teams comprised of visual designers and developers to successfully prototype, test, and pitch the future design direction of the mobile client to company executives.
